Wireless connection To enjoy Android cars in wireless mode The phone must support the Android car wireless. BIMMERTECH Android Auto MMI Prime supports wireless connection just like the original software, but the list of officially compatible phones only covers the Google pixel and Nexus lines and Samsung Galaxy phones with Android 8.0 or higher. Once coupled in wireless mode, the phone automatically connects with the MMI whenever you enter your BMW, without you even removing your phone from your pocket or bag. But Android Auto MMI Prime has a personalized solution: Android Auto Link app. As with a complete front coverage, you need to pay a deductible before your car is fixed or a replacement vehicle is delivered. This type of coverage is not mandatory, but if you turn a car or rental of a vehicle, the lender may insist on the fact that it has been covered by a complete insurance. The possibility of adding front and rear-view cameras for a lower price Android Auto MMI Prime is based on an original BIMMERTECH media module (MMI) which guarantees the connection between external software and the BMW native system. Thousands of BMW owners were disappointed not to be able to use Android phones in their favorite vehicles.
